Assignment #1

Data Self Portrait

Campbell Smith

Sketch #1: Light Usage

For my first data set, I collected data for three days around my lighting usage, everytime a light was turned on or off I noted it down, alongside the time, type of light, and room.

I was curious about this data for it's visuals that I could create with it, as well as what it said about habbit, giving me the ability to track my movement within my flat over the three days tracked.

Utilising claude code I was able to make a simulation of the lighting changes over the collected data, the lights being toggled each time they are mentioned just as I tracked.

07.03.26	11.38pm	Overhead	BEDROOM
07.03.26	11.38pm	Lamp	BEDROOM

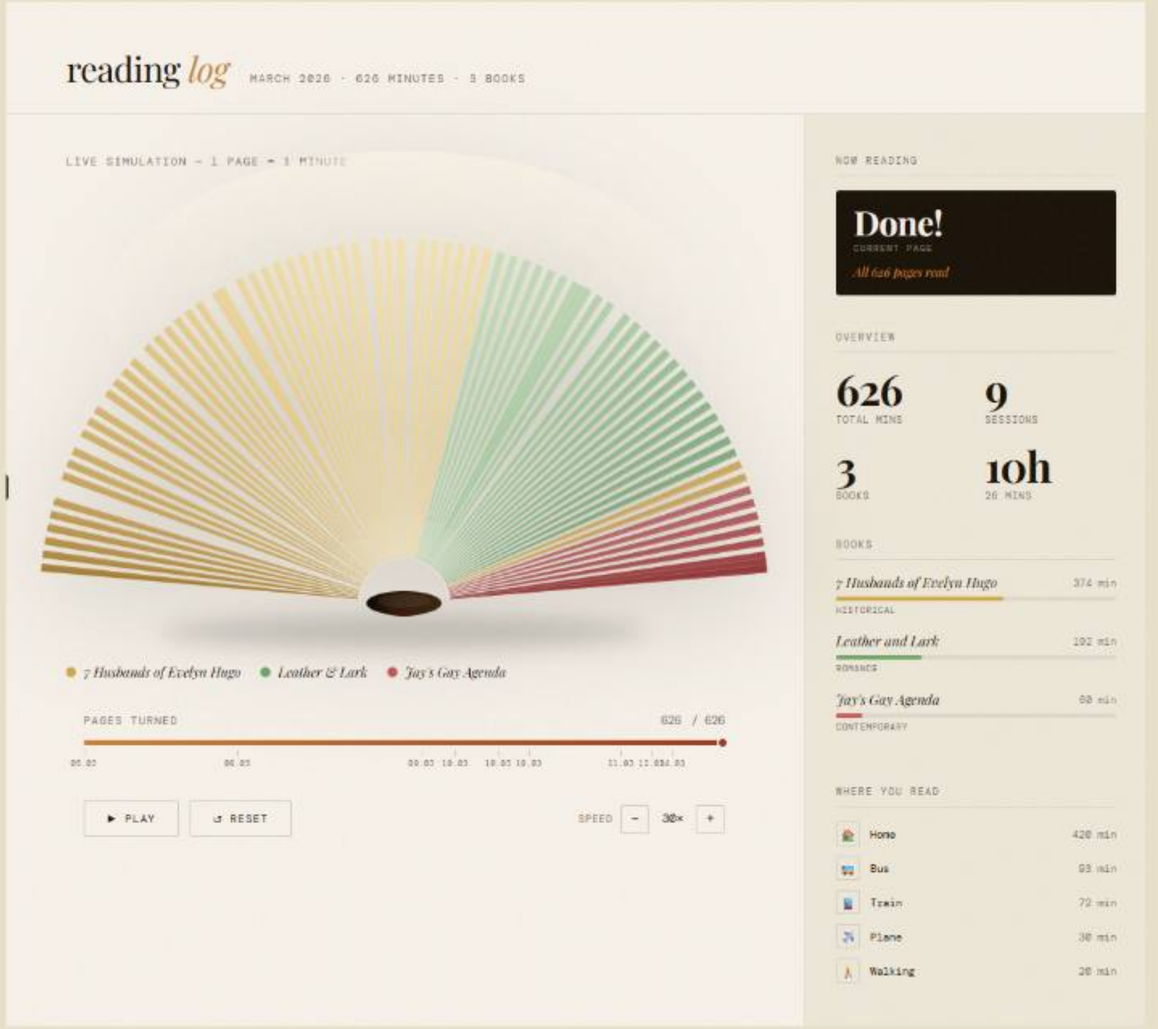

Sketch #2: Reading

For my next sketch I tracked my reading, in terms of time spent.

I was curious as to how this could be sketched out with Claude, and wanted to add to my initial sketch where I had used data from my StoryGraph Account, which broke down all my reading data from the last 2 years.
This time I used the same open book layout to create the visuals but added in the simulation element I learn about from the light sketch I did.

I tracked this data using screentime from my ereader, progress from my audiobook, and via manual time counting for my physical book. All of these methods are likely not fully accurate, as I would not be consecutively reading, and my audiobook time was effected by the playback speed it was listen to at.

Date	Where	Why	Time Spent	Genere	Book
05.03.26	Home	Entertainment	2.5 Hours	Historical	7 Husbands of Evelyn Hugo
06.03.26	Home	Entertainment	3 Hours	Historical	7 Husbands of Evelyn Hugo
09.03.26	Bus	Entertainment	33 Minutes	Historical	7 Husbands of Evelyn Hugo
10.03.26	Train	Entertainment	42 Minutes	Romance	Leather and Lark
10.03.26	Train	Entertainment	30 Minutes	Romance	Leather and Lark
10.03.26	Home	Entertainment	1.5 hours	Romance	Leather and Lark
11.03.26	Plane	Entertainment	30 Minutes	Romance	Leather and Lark
12.03.26	Walking	Entertainment	20 Minutes	Historical	7 Husbands of Evelyn Hugo
14.03.26	Bus	Entertainment	1 hour	Contemporary	Jay's Gay Agenda

Sketch #3: Language

After my mother has commented so many times on my swearing I decided I would track it.

The idea of tracking swearing of course lends to a swearing jar visual which I thought would be fun for poking fun at, and would be an effective way to measure visually swearing. I wanted to present the data statically, as I have already played around enough with the idea of simulations to show data, so just utilised pattern to show reasoning for the language, and colour to show the word used.

This data was recorded by notting down everytime I swore, so is likely not ffully acurate, and as my pyschology student flatmate pointed out, likely bias and not truly reflective of how often I swear due to increased awareness.
