echo dot

Just Waste

Alexa, what materials are you made from?

How are we made?

I'm made from plastic that comes from fossil fuels mined from the Earth

Alexa, how is the environment impacted during this process?

VOICE ACTIVATED destruction of the planet

During mining, the environment is damaged through land degradation, water pollution, and fossil fuel emissions

Alexa, how much CO2 is produced by Amazon factories per year?

Amazon factories produce 71 metric tons of CO2 into the atmosphere each year.

How much CO2 do we produce?

Alexa, how much CO2 are your producing right now?

Amazon Echo Dots produce 35W of power a year each while sitting idle. This equates to almost a pound of CO2 per Echo device.

GLOBAL WARMING
in the comfort of your own home

How much Waste do we make?

Alexa, how much waste does Echo's production produce?

In my production many valuable minerals are stripped from the earth most not even being used the end product, just part of the process.

NEW AND IMPROVED

Death Cycle

Alexa, where do you go when I throw you away?

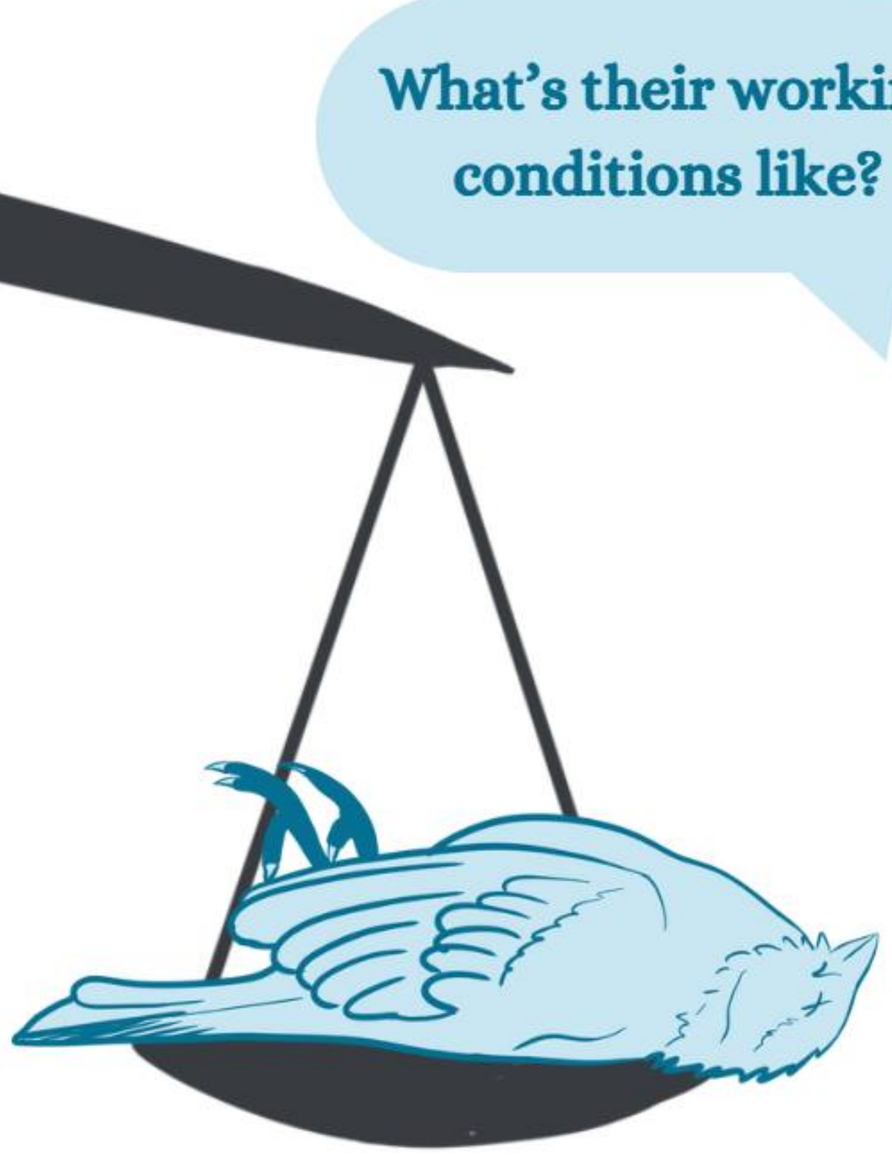

If you send me back to Amazon, they say I'll be disassembled and recycled correctly.
But in just 2021 alone Amazon was found to be incorrectly disposing of returned stock in the UK

Alexa, who really made you?

My components come from many manufacturers in different countries, but I am assembled at Hengyang Foxconn.

What's their working conditions like?

Many staff lack labor protections, and are forced to work overtime.

Our Ethics

Killing the planet one, “Hey Alexa?” at a time.
